Re: Mandatory Use of Graphite Connect for New Suppliers Providing Goods and/or Services

To support Supply Chain Management's ongoing efforts to strengthen supplier management, improve data accuracy, and enhance compliance, all new suppliers who provide goods and/or services to UCSF are required to onboard through Graphite Connect.

Effective February 26, 2026, suppliers must complete registration in Graphite Connect before they can be established in UCSF's procurement system. Supplier information forms will no longer be accepted.

Suppliers will receive an invitation from the requesting UCSF department and must submit their information directly through the Graphite Connect platform. The system enables suppliers to securely provide and maintain their information, ensuring accuracy and improved data integrity across UCSF.

Thank you for your cooperation and for supporting a more secure and streamlined supplier onboarding process.
